

3rd International Conference on Dental Medicine and Surgery

Priya Shetti *

Professor, Department of Pediatric and Preventive Dentistry, Uttarpradesh, India

[Conference Series](#) is esteemed to invite you to join the “3rd International Conference on Dental Medicine and Surgery” which will be held from August 26-27, 2020 at [Singapore](#) which includes prompt keynote presentations, oral talks, poster presentations and exhibitions.

The conference has been carefully designed to acknowledge the various recent researches going on in the field of [dentistry](#). In addition to the paper presentations, the conference will provide its attendees to attend sessions of presentations and debates, workshops and symposiums as well as poster presentations. This conference on dental and [oral health](#) will deal with various tracks from the different fields of [dentistry](#). The congress provides you with a unique opportunity to meet up with peers from both industry and academia. We cordially invite all concerned people to come and join us at our event and make it a successful one by your esteem participation.

Dental Anesthesiology: Dental anesthesiology is the specialty of dentistry and discipline of anesthesiology encompassing the art and science of managing pain, anxiety, and overall patient health during dental, oral, maxillofacial and adjunctive surgical or diagnostic procedures throughout the entire perioperative period. The specialty is dedicated to promoting patient safety as well as access to care for all dental patients, including the very young and patients with special health care needs.

Dental Public Health: Dental public health is the science and art of preventing and controlling dental diseases and promoting dental health through organized community efforts. It is that form of dental practice which serves the community as a patient rather than the individual. It is concerned

with the dental health education of the public, with applied dental research, and with the administration of group dental care programs as well as the prevention and control of dental diseases on a community basis. **Endodontics:** Endodontics is the branch of dentistry which is concerned with the morphology, physiology and pathology of the human dental pulp and periarticular tissues. Its study and practice encompass the basic and clinical sciences including biology of the normal pulp, the etiology, prevention treatment of diseases and injuries of the pulp and associated periarticular conditions. **Oral and Maxillofacial Pathology:** Oral pathology is the specialty of dentistry and discipline of pathology that deals with the nature, identification, and management of diseases affecting the oral and maxillofacial regions. It is a science that investigates the causes, processes, and effects of these diseases. The practice of oral pathology includes diagnosis of diseases using clinical, radiographic, microscopic, biochemical, or other examinations.
